

Rick Gauci - Top Alcohol

Top Alcohol racing places extreme forces on engine parts that rev in excess of 8500RPM during a quarter mile pass. Brad Penn has exceeded our expectations in every way, offering unsurpassed protection at a very affordable price!

Ben Gatt - Supercharged Outlaws

I had to get my hands back on "The Green Oil". Brad Penn is used in every engine I build and is what I know & trust in my own race car. I recommend Brad Penn with it's original formula & high levels of Zinc only found in Pennsylvanian Grade Crude Oils!

Andrew Musgrave - Modified

In the heat of bracket racing we don't have time to cool the engine down, but Brad Penn consistently performs round after round! I tell everyone at the track how well "The Green Oil" works for us and I would not recommend any other oil for a race engine!

Rob Campisi - Super Sedan

My twin turbo 1800HP engine has run 6.90's at over 200mph using Brad Penn. My engine builder is impressed by the performance of "The Green Oil" as other oils have deteriorated with the extreme heat that the turbochargers produce. I rely on Brad Penn to protect my investment!

• Former Kendall Motor Oil Refinery

In 1997, the Kendall Motor Oil brand was sold by the Witco Corporation, as a result the American Refining Group purchased the Bradford, Pa refinery, formerly known as the home of Kendall Motor Oil.

A new name was given to the products produced at the site: Brad Penn Premium Pennsylvania Grade Lubricants.

• 100% Pennsylvanian Crude

Unlike others, Brad Penn is refined from 100% Pennsylvanian Grade Crude which is a very thermally stable paraffinic crude oil, containing no asphaltic constituents.

• Naturally Green

That's right! When the base oil is cut from the tower, it is a dark green in colour! No dye is added to give the Brad Penn it's unique green colour!

• High In Zinc

Brad Penn is rich with Zinc & Phosphorus that provides outstanding anti-wear/anti-scuffing protection.

Only inferior base oils require added zinc!

• Unique Metal Wetting Properties

The unique base oil causes Brad Penn to cling tenaciously to engine parts due to the Tri-Polar Molecules contained within the base oil. This is like having three magnets on every molecule, the oil just sticks metal!

• Break-In 30 Recommended

Top US manufacturers recommend Brad Penn for use with their components! Camshaft companies such as Crane, Crower & Howards endorse Brad Penn, along with top Engine Builders and race teams worldwide!

Racing Multi-grades: 0W-30 · 10W-30 · 10W-40 · 15W-40 · 20W-50

Racing Mono-grades: 30 · 40 · 50 · 'Nitro' 70

Break-In 30: Enhanced levels of Zinc & Anti Scuffing Protection

History

In 1997, American Refining Group, Inc. (ARG), a privately held energy company headquartered in Philadelphia, PA, purchased the Kendall/Amalie refinery located in Bradford, PA, from Witco Corporation. As a result of the sale by Witco, of the Kendall® and Amalie® brands to a third party, a new name was given to the products produced at the site: Brad Penn® Premium Pennsylvania Grade Lubricants.

Founded in 1881 at the height of the domestic oil boom, the Bradford refinery is the only refinery processing 100% Pennsylvania Grade crude oil. It is also the oldest continuously operated lube oil refinery in the world.

Due to the consistency of our feedstocks, the quality of our products can be traced from the wellhead to the finished packaged product. ARG's refinery and blending and packaging operations are ISO 9001:2000 certified.

The Bradford refinery was the first in the United States to carry the ISO 9002 certification.

Why is it so good?

The term "100% Pure Pennsylvania Grade Crude Oil" has long carried with it an industry connotation for being one of the best sources of high quality lubricant base stocks in the world. PA grade crude oil is a very thermally stable paraffinic crude oil which contains no asphaltic constituents. This makes it an ideal choice from which to refine premium quality base oils. Because we use only one crude stock, our refined products are of consistently high quality and performance.

BRAD PENN® brand products are proudly "MADE IN THE U.S.A" in Bradford, PA. The former Kendall refinery is the home of "The Green Oil®" that racers, engine builders & enthusiasts alike have all come to know and love! The unique green colour and outstanding performance of our Penn Grade 1 High Performance Oils set them apart from the competition.

BRAD PENN® Penn Grade 1® High Performance Oils are formulated using a unique base oil cut from our tower, which gives our Penn Grade 1® High Performance Oils exceptional film strength. This unique base oil causes our Penn Grade 1® High Performance Oil to cling tenaciously to engine parts to minimize wear during high engine torque loading and/or periods of heavily stressed operation such as those experienced during competition. In addition to our unique base oil cut, increased concentration of zinc & phosphorus that provides outstanding anti-wear & anti-scaffing protection for engines employing either 'flat tappet' or roller cams.

BRAD PENN® PENN-GRADE 1®

Partial Synthetic SAE 0W-30 High Performance Oil

A high-performance, lighter viscosity oil specifically designed to maximize horsepower. Penn Grade™ base oils provide superior film strength while synthetic stocks enhance performance throughout a wide range of operating temperatures and conditions.

BRAD PENN® PENN-GRADE 1®

Partial Synthetic SAE 10W-30 High Performance Oil

A truly versatile High Performance Oil suitable for engines used both on the street and/or the track. The multi-viscosity grade and synthetic components facilitate cold starting and quicker engine warm-up while insuring adequate engine protection during competition.

BRAD PENN® PENN-GRADE 1®

Partial Synthetic SAE 20W-50 High Performance Oil

Designed to offer higher performance engines the cold temperature operational benefits of an SAE 20 while providing the desired film strength for sealing abilities and valve train component protection of an SAE 50 weight oil at normal engine operating temperatures.

BRAD PENN® PENN-GRADE 1®

SAE 40 High Performance Oil

This heavy viscosity straight-grade motor oil is designed to provide excellent protection for older style engines. This is an excellent option for vintage car lubricant and air-cooled applications where a mono-grade viscosity is preferred or required.

BRAD PENN® PENN-GRADE 1®

SAE 50 High Performance Oil

Heavy viscosity, straight-grade motor oil designed to provide superior lubrication to high-performance competition engines fueled by gasoline, methanol or nitromethane. Superior alcohol separation assures continual lubricant protection to the engine.

BRAD PENN® PENN-GRADE 1®

'Nitro' 70 High Performance Oil

High viscosity, high-performance motor oil engineered for use in nitromethane or methanol fueled competition engines. The heavy viscosity and exceptional film strength helps protect against cylinder 'wash down' & 'thinning' from fuel dilution typical in these applications.

BRAD PENN® PENN-GRADE 1®

SAE 30 Break-In Oil

This oil is formulated specifically to meet the critical lubrication needs of new engines during break-in while allowing proper seating of rings and components. Enhanced levels of zinc and superior oil film strength offer a complete anti-wear, anti-scaffing protection required!

Endorsed by manufactures such as Crane, Crower & Howards Camshafts.

Maurice Fabietti - Top Doorslammer

3000+hp Doorslammer's demand the best lubrication possible and from the first time we used Brad Penn we noticed the benefits! The oil pressure was more stable, it does not discolour or dilute the methanol and sticks to every part, run after run! The whole team is impressed!

Phil & Sam Parker - Top Bike

The engine we purchased from the USA came with instructions to use Brad Penn 'Nitro 70' "Your bearings will last all season with Brad Penn" The bike has done some hard laps, even producing personal best times!

The crank bearings come out looking like new!

Rob & Jason Maggs - Competition Eliminator

In our Mustang we run a small cube high revving highly stressed engine. Since switching to Brad Penn, as the engine builder my stress levels have dropped massively! We have tried many brands of oil, but there is a stark protection difference with Brad Penn. All the promises for this oil are true!

Shaun Liefting - Supercharged Outlaws

When we learned the original "Green Oil" was once again available we instantly changed, and noticed the difference immediately! Our oil is no longer 'milking up' with the methanol and the bearings look fantastic!

We trust the protection the original "Green Oil" provides!
